Girls Who Code

Girls Who Code is a non-profit organisation dedicated to closing the gender gap in technology by teaching girls computer science, bravery, and sisterhood.

Girls Who Code Clubs are free after-school programs designed for girls with a wide range of computer science skills between the ages of 11 and 18. In Clubs, girls engage in online coding tutorials, build community through interactive activities, learn about inspiring role models in tech, and work together to design solutions to real-world problems facing their communities.

Our programs empower girls with the confidence, support, network, and technical skills they need to change the world!
